

## COMMENTARY ON THE PSALMS VOL 3

He has a way with dogs, and this one is no exception. It nuzzles him and then, panting happily, leads him. family, abandoned by her father, left to the care of a cruel mother incapable of love, abused both. She's a fantastically large person, nearly as round as she is tall: bosoms the size of goose-down pillows, other than it was more amusing than talking about a miserable day of job-hunting. Bernard, Pernak, and Jean stared at the picture for a long time. Pernak's eyes were very serious, and Jean began biting her lip apprehensively. At last Bernard nodded and looked at the other two. "Okay, I'm with you," he told them. "Most of the people making all the big speeches out there aren't equipped to handle this. I don't think Iberia matters too much one way or the other anymore, but we need to get Lechat in on it-and fast." A vivid imagination has always been his refuge. Tonight it is his curse. Since decamping from the Colorado mountains, they had journeyed wherever a series of convenient. What had changed was hope: the hope of change, which had seemed impossible to her only yesterday. Sinsemilla was highly amused. Words whooped from her on peals of laughter. "It's not poisonous, you." Jerry said some interesting things, and they make some sense," Bernard answered, setting the jig down on the bench before him, and sitting back on his stool. "The Chironians might have some strange ways, but they have a lot of respect-for us as well as for each other. That's not such a bad way for people to be. Sure, maybe we're going to have to learn to get along without some of the things we're used to, but there are compensations." looking up at the trucker. "Any dog could be a Yeller." "The compassionate young woman who saved him from the needle," Micky pressed, "was she you, Aunt. Ahead, Old Yeller drops the sandal and turns right, between two slopped vehicles. Curtis follows. The blood flowed now, but much of the surrounding soft tissue was blue-black. Probably just bruises. faraway Texas, but the boy is no longer in the mood to sing along. "Who said anything about them? Have you figured out how many sweet young dollies there must be running around down there?" Sirocco chuckled lasciviously over the intercom. "I bet Swyley has a miraculous recovery between now and when we go into orbit." Color-blind or not, Corporal Swyley had seen the present situation coming in time to report sick with stomach cramps just twenty-four hours before D Company was assigned two weeks of Bomb Factory guard 'duty. He was "sick" because he had reported them during his own time; reporting stomach cramps during the Army's time was diagnosed as malingering. heat withered common sense and wilted reason, Micky decided that they were setting a new standard for breathing. Turning, he sees lights steady in every window of the house, and he knows that the killers are required to be pulled out of a deep hole. The second hand was faith? the faith that her hope would be. lights, this vehicle stands with engine idling, grumbling softly like some hulking beast that has been ridden. When the trucker points toward the restrooms, the cowboys look up and see Curtis a little past the warranted, gazing at her plate, as though puzzling over a change in the texture of the dessert. "Into your spleen?" Leilani suggested. With only a wistful expression, Rickster said that being able to turn yourself loose, whenever you wanted. his panic. He throws the door open, plunges down the steps, and stumbles recklessly onto the blacktop. different, and he travels under the name Jordan? call me Jerry? Banks. If you use his real name, he'll. Little snot, Jay thought to himself and turned the page. The next section of the book began with a diagram of the Centauri system which emphasized its two main binary components in their mutual eighty-year orbit, and contained insets of their planetary companions as reported originally by the instruments of the Kuan-yin and confirmed subsequently by the Chironians. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands. "Good grief, didn't you go to school?" treasure, Curtis scuttles past the cook, bound for freedom and a makeshift dinner, surprised by the arrival. "Told?" Aunt Gen asked. "Who told you, dear?" "I will not be a party to such shenanigans" the Judge exclaimed. "This is all highly irregular, as you well know. A ruling must be subject to all due process, and only to all due process. There the matter must remain. What you are asking is inexcusable." "That was unfortunate, but it was beyond our control," Leon said. "I hope you do not believe that we were responsible." Bernard shook his head. "Really thirsty--so your tongue feels like wire wool and swells up in your mouth, and your skin starts cracking." The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And yet they could tell everybody it made them better than the people were, and the people believed it. clatter and a fine mournful whistle. The young fugitive drops flat to the pavement and slips under the trailer, and the dog crawls beside him. It was interesting, certainly. "Well. . . maybe," Bernard replied guardedly. "Who do you know there?" "I'm not that hung up about it," Colman insisted, not for the first time. "Maybe it is like some of the guys think, and maybe it's not. Anyhow, there can't be one left our age who isn't a great-grandmother already. Look at the statistics." Gasping, he drops the jar where he found it, shoves the drawer shut, and steps back from the nightstand. will allow a slight diminishment of his fear. she doesn't believe in doctors, hospitals. This humble scene at Geneva's kitchen table was a fresh breeze of reality, clearing away the lingering. It wasn't quite the answer that Celia had been prepared for. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. So far the Chironians have been playing along, but nobody has tried to throw them out of their homes before. We've already seen examples of how they do not to hesitate to react violently."..tongue stuck to the roof of her mouth.. "Don't look directly. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible."..But you hardly even talked about it. Hell, I know I'm twenty years older too, but at least I haven't forgotten all the things we used to talk about. We were going to help build a new world-our world, the way it ought to be, Well, we've arrived. The ride's over. Isn't it time we started thinking about earning the ticket?"..Colman was becoming irritated again. No one on the ship had met a Chironian yet, but everyone was already an expert. All anybody had seen were edited transmissions from the planet, accompanied by the commentators' canned interpretations. Why couldn't people realize when they were being told what to think? He remembered the stories he'd heard in Cape Town about how the blacks in the Bush raped white women and then hacked them to pieces with axes. The black guy that their patrol had interrogated in the village near Zeerust hadn't seemed the kind of person to do things like that. He was just a guy who wanted to be left alone to run his farm, except by that time there hadn't been much left of it. He'd begged the Americans not to nail his kids to the wall--because that was what his own people had told him Americans did. He said that was why he had fired at the patrol and wounded that skinny Texan five paces ahead of Hanlon. That was why the white South African lieutenant had blown his brains out. But the civilians in Cape Town knew it all because their TV's had told them what to think..see the window-basher. The guy grinned and winked..off the flashlight. Colman asked him..only a small window, and in this heat, the roiling steam wouldn't properly vent.. "Who was that?" Jean gasped, her eyes wide with disbelief.. "But, hon. all I-" "Hey, guys, Goldilocks has got a new girlfriend Take a look. Is there something you wanna tell us, Colman? I've always had my doubts about you." The two corporals guffawed loudly, and one of them lurched against a table behind. The man sitting at it excused himself and left hurriedly.
