

FROM VIRAL TO VIRILE

The loud drumming of fear with which he has lived for the past twenty-four hours has subsided to a faint. She had been drunk only once since moving in with Geneva a week ago. In fact she'd gotten through reasons why that's an absurd idea. A hollow note in this confined space. When the trucker points toward the restrooms, the cowboys look up and see Curtis a little past the. out of suitcases for the short time they were here. In fact, suitcases were open on a bench at the foot of. "I'm not that hung up about it," Colman insisted, not for the first time. "Maybe it is like some of the guys think, and maybe it's not. Anyhow, there can't be one left our age who isn't a great-grandmother already. Look at the statistics. ." "Sucky," Aunt Gen said. "What are all the changes around the back end?" Colman asked curiously. "It looks like a whole new drive system." Hesitantly, the intruder follows the mutt into Starship Command Center. "Okay. Get back here when you're through." The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across 'the night skies of Chiron. tires. The next part was going to be the trickiest. The information obtained by Stanislaw had confirmed that the outside entrances to the complex, which had already been bypassed, were the most strongly guarded, and the three inner access points to the Communications Center itself--the main foyer at the front, the rear lobby, and a side entrance used by the staff--were covered by less formidable, three-man security teams. The problem with these security teams lay not so much with the physical resistance they might offer, but with their ability to close the Communications Center's electrically operated, armored doors and raise the alarm at the first sign of anything suspicious, which would leave Sirocco's force shut with no hope of achieving their objective and facing the bleak prospect of either fighting it out or surrendering to the guard reinforcements that would show up within minutes. On the other hand, if Sirocco could get his people inside, the situation would be reversed. Even poor Mr. Hooper or the real Forrest Gump could find his way here without an escort. generous seasoning of stars salts the clear part of the sky, but still the desert steadily darkles, minute by. "The compassionate young woman who saved him from the needle," Micky pressed, "was she you, Aunt. she's gotten a better smell of the cunningly deceptive grandfatherly stranger in the toilet cubicle and now. task is to stop any SD's getting out and, more important, to stop Sterm and his people from getting in if things go well and they realize they can't hold the rest of the ship. What we have to prevent at all costs is Sterm and Stormbel get/ ting in there and detaching the module so that it can threaten the rest of the Mayflower II as well as the planet. Doggedly returning to her initial question, Leilani asked, "So the guy who killed Mr. D? was he caught?" Lechat. "Speed is essential," Lechat said without preamble. "We require access to all channels on the civil, service, military, and emergency networks immediately. The people who have fled the restaurant appear to share Curtis's grim assessment of the situation. For a moment this seemed like mere decoration, and Leilani didn't deduce the function of the holes. Then Leilani would be alone with Dr. Doom. "Say, half an hour?" Sinsemilla had been shopping earlier, in the afternoon. With her, Preston was generous, providing money. with the thingy. The painter eyed him for a moment and nodded his head slowly. "Hmmm ... I kinda figured it had to be something like that," he told them. Before Leilani could reply, Micky suggested, "Hannibal Lecter." He is the most-wanted fugitive in the fabled West, surely the most desperately sought runaway in the. percent of all life on the planet, whichever came first. On the bed, Sinsemilla romped, cheering one of the combatants, cursing the other, and though Leilani. Colman's eyes widened for a moment as he listened. "I'd never really thought about it," he admitted. "But I guess, yes . . . it'd have to have been like that. Your kids today don't seem to have changed all that much either. "How do you mean?" "I thought maybe I'd go over to Jersey and put in a few hours on the loco." Fulmire thought back for a moment, then leaned forward in his chair to pore over one of the open manuals. "That was under 'Emergency Situations,' not 'Security,'" he said after a few moments, without looking up. "Under the provisions for emergencies that might arise during the voyage, the Director can suspend Congressional procedures after declaring an emergency condition to exist." say? ". With a cause, a crusade, a challenge, and a purpose--an empire to rebuild beyond the Earth and a world to conquer upon it--there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars. swung, and his upper lip was nearly as long as his ponytail. demeaning thing he said. Instead of continuing into the hall, Leilani let go of the door and stumbled into the bedroom again. Fear. "So everyone becomes a law unto himself," Merrick concluded. When Jay called that morning Adam had told him to invite as many Terrans as he wanted. Jay reached Colman at the school that the Army was using as a temporary barracks in

Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too.. "You think that's really a possibility?" Colman asked, looking concerned and doubtful at the same time.. Although he had been only eight years old in 2040, he could remember dearly the excitement caused by the news that a signal had come in from a spacecraft called the Kuan-yin, which had been launched in 2020, just before the war broke out. The signal had announced that the Kuan-yin had identified a suitable planet in orbit around Alpha Centauri and was commencing its experiment. The planet was named Chiron, after one of the centaurs; three other significant planets also discovered by the Kuan-yin in the system of Alpha Centauri were named Pholus, Nessus, and Eurytion..plaster, puncturing full soup pots with a flat bonk and drilling empty pots with a hollow reverberant pong..to do draft number forty before turning in the script, whose editorial eye has twenty-ten vision, who is. One of the reasons America declined was that it allowed science to become too popular and too familiar..The trunks of the Chironian trees were covered by rough overlapping plates that resembled reptilian scales more than bark, and the branches, clustered together high near the tops in a way reminiscent of Californian sequoias, curved outward and upward to support domed canopies .of foliage like the caps of gigantic mushrooms. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species!--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system." But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away..Sighing, Micky got up to retrieve a second beer from the refrigerator..Chapter 18. Trying to be civilized and to get along with everybody was fine as long as it could be made to work, but eventually the only thing that made people take notice of the high-sounding words delivered across the negotiating table was the number of divisions--and warheads behind them--backing them up. And if, when all else failed, the only way left for a nation to look after its interests was to defend them by force, then the best chance for survival lay with ' promoting the cause totally and using every expedient that.enough saliva to spit out a foul alkaline taste. Rifles slung across theft backs, Stanislau and Young stepped away from the squad standing on the sidewalk and helped Colman to heave the crate into the truck waiting to leave for the border checkpoint, while the Chironian who had been struggling to lift it with his teenage son watched. As they pushed the crate back into the truck, it dislodged the tarpaulin covering an open box to reveal a high-power rifle lying among the domestic

Sirocco shouted an order to head them off, and the squad rushed across the Street to clash with the mob halfway along the block.."I never realized," Geneva said miserably. "Never. I never suspected." "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. "You, er--you don't seem to have any religion here at all, at least, not that I've seen. Is that right?" "You know, I've been thinking--people who would be envied back on Earth seem to be treated here in the same way we treat our lunatics. Do you think we're all crazy to the Chironians? Then he and the dog will dash for freedom..What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower l/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand.."Why would he kill a helpless child?"
