Slowly, Selene twisted the wrist back and down while the poly around them swirled in wave after wave of color pulsating with every labored breath of the struggling body. The maelstrom spread out across the floor and up the walls, even affected the chairs so that they, too, raged with color and pulsed to ? the time of Amanda's breathing..Even turning my head can set it off. Harry hadn't answered my knock, and so I let myself ia with a credit card."I suppose you'll be anxious to go to the ship," he said. "You're going to be a tremendous help. But they never do; in fact, it seems absolutely impossible to write anything without immediately making all sorts of assumptions about what human nature is, what good and bad behavior consists of, what men ought to be, what women ought to be, which states of mind and character are valuable, which are the opposite, and so on. Once fiction gets beyond the level of minimal technical

competence, a reviewer must address these judgments of value. Generally, readers don't notice the presence of familiar value judgments in stories, but do notice (and object to) unfamiliar ones as "political." Hence arises the insistence (in itself a very vehement, political judgment) that art and politics have nothing to do with one another, that artists ought to be "above" politics, and that a critic making political comments about fiction is importing something foreign into an essentially neutral area. But if "politics" means the relations of power that obtain between groups of people, and the way these are concretely embodied in personal relations, social institutions, and received ideas (among which is the idea that art ought not to be political), then such neutrality simply doesn't exist. Fiction which isn't openly polemical or didactic is nonetheless chock-full of politics. If beauty in fiction bears any relation to truth (as Matthew Arnold thought), then the human (including social and political) truth of a piece of fiction matters, for aesthetic reasons. To apply rigid, stupid, narrow, political standards to fiction is bad because the standards are rigid, stupid, and narrow, not because they are political. For an example of (to my mind) profound, searching, brilliant, political criticism, see Jean-Paul Sartre's *Saint Genet*. . . out a deck of cards. . . know so much of what we were sent here to find out. With an inarticulate screech, he ploughs through them, swatting them aside with the backs of his hands, kicking them out of his way with his heavy-booted feet. The Intermediaries break easily, and it occurs to me then that they are probably as disposable a commodity among the Sreen as tissue paper is among human beings. One Intermediary is left limping along after the captain. Through the clear pale skin of its back, I see that some vertebrae have been badly dislocated. The thing nevertheless succeeds in overtaking the captain and wrapping its appendages around his calf, bleating all the while, "No, no, you must abide by the edict, even as every other inferior species has, you must abide. . . ." The captain is having trouble disentangling himself, and so I go to him. Together, we tear the Intermediary loose.
