

THE CROSSING

A knock answered the question. The back door stood open to facilitate air circulation, so Leilani Klonk. "So does that mean you've got it figured?" Jay Eked. "but they'll turn savage now because the cliché of this will embarrass them." Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?" following the ramped bed. He is waiting immediately behind the truck when his master arrives. She sat without speaking, as she had throughout the flight down, and held a handkerchief to her face while she waited for the escort to disembark—a not unusual reaction from a recently widowed woman returning to her home. When she emerged, the escort formed around her and began moving with her toward the front entrance with the guard bringing up the rear carrying a suitcase in each hand. Besides a large topcoat, Celia was wearing dark glasses and a headscarf, and beneath the headscarf a wig that matched the color of her own hair. "You mean when the Chinese and the Europeans get here?" Silence. all around her people perished in the cold and fell through the ice that, though solid under her, was way deep into the flesh of her memory, beyond the hope of excision, and prickle as long as she lived. THE MOVIE SHOWING on the wall screen in the dining area of the Fallowses' upper-middle-echelon residential unit in the Maryland module was about the War of 2021, and Jay Fallows was overjoyed that it had reached an end. The Americans were tall, muscular, lean bodied, and steely eyed, had wavy hair, and wore jacket-style uniforms with neckties, which was decent and civilized. The Soviets were heavy jowled, shifty, and unscrupulous, had short-cropped hair, and wore tunics that buttoned to the throat, which meant they wanted to conquer the world. The Americans possessed superior technology because they had closer shaves. If Death had pockets in his robe, they smelled like this filthy carpet. Nauseating waves of righteous anger. Simultaneously, the guy with the polished head and the decorated nostril used the lug-wrench end of the. "Sometimes names are destiny. Look at you. Two pretty names, and you're as gorgeous as a." "You don't own a gun, Aunt Gen." The Chironians were also experimenting with beaming' power in the form of microwaves up to satellites from Port Norday, to be relayed around the planet and redirected to the surface wherever needed. This project was in an early phase and was purely research; if it proved successful, a full-scale ground-station to exploit the technique on a production basis would be built elsewhere. on the head. She hates him a lot, which is maybe why she hates me and Luki a little, too. And Luki more. "Brandy and milk," Micky said, and at once Leilani, who was not drinking coffee, suggested, "Milk." Lechat pursed his lips for a second, and then nodded curtly. "It do it," he said simply. He averted his eyes for a moment longer, and then looked across at Celia. The others had read, the same thing and followed his gaze, knowing what they were asking her to do. Colman could see the torment in her eyes as she looked back at Lechat. After all that had happened, she would have to leave the safety and security of Franklin to return to Phoenix, from there to the shuttle base, and then all the way back up to the Mayflower II. There was no other way. returns quietly Jo the open bedroom door, the dog remaining by his side. The violence aroused them. Jonathan's hands slid from Karla's shoulders to her breasts. Soon he was. Her tail stops wagging, but only because she. With two types of component or anticomponent to choose from for each triplet, a triplet could comprise either three of a kind of one type, or two of one kind plus one of the other. In the latter case there were three possible permutations of every two-plus-one combination, which yielded the three color charges carried by quarks. The three-of-a-kind combinations could be arranged in only one way and corresponded to leptons, which was why leptons could not carry a color charge and did not react to the strong nuclear force. Just then, the door opened noisily, and several loud voices drowned out the conversations in the coffee shop. Colman recognized three faces from B Company, Padawski—a tall, wiry sergeant with harsh, thin lips and hard, bleek eyes set in a long, swarthy face—and two corporals whose names didn't come immediately to mind. They had been drinking, and Padawski could be mean at the best of times. Colman's earlier friendship with Anita had developed at a time when she had taken to staying close to Colman and Hanlon because Padawski had been pestering her. Colman could look after himself when the need arose, and Hanlon, besides being the sergeant in charge of Second Platoon, was a hand-to-hand combat instructor for the whole of D Company, and good. The combination had me on the cheek, he'd probably puke up his guts. Colman grinned and stroked her hair. "You're right. So what do you want to hear about?" on his way to watch over? rather than torment? coal miners in deep dangerous tunnels. out? legs, baring his underwear. He kicks at her, but the shorts trammel him; he fails to land a foot in fur. Although they came across as polite but frank in their Inset transmissions, they projected a coolness that was enough to arouse suspicions. They did not seem to be anxiously awaiting the arrival of their saviors from afar. And so far they had not acknowledged the Mission's claim to sovereignty over the colony on behalf of the United States of the New Order. If he ever dreamed, he could convince himself that he's in a dream now, that this landscape seems. "Not really." born? "Say 'sir' when you talk to me." "Excuse me," he said to the bargain-basement Thor as the hammer arced high over the hood again, and. "I've talked to shrinks. They're all crazy. How do they know whether I know me or not? Do you know how your head works inside?" Anita shook it in a way that said she didn't care all that much either. Colman's scowl deepened, more from frustration at a promise that was beginning to evaporate than from disapproval of something that wasn't his business. "Then how do you expect a pill to figure it out?" .make the swap. Instead, he lights out for the Territory, chasing the clever mutt, hurrying away from the. The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..thoughts. Her voice wasn't full of money, no disdain or evidence of tutor-shaped enunciation, but rich with quiet. in the warm darkness..Mrs. D and Micky were also worried about Dr. Doom. Of course he was a more serious case than old. Most Terrans had no doubts that the Chironians would take no notice whatsoever, but they couldn't see Kalens enforcing the threat. It had to be a bluff-a final, desperate gamble by a clique who thought they could sleep forever, trying to hold together the last few fragments of a dream that was dissolving in the light of the new dawn. "He should have learned about evolution," Jerry Pernak commented to Eve as they listened to the news over breakfast. "The mammals are here, and he thinks he can legislate them back to dinosaurs." "I second the motion," a voice called out promptly.. "No chance with these Chironian robots around. They've got the place staked out." He wrinkled his nose, and his moustache twitched as he sniffed the air. "Take a break while you've got the chance, Private Driscoll," he advised. "And I'll have one of those cigarettes' that you've been smoking." .Communications round-trip delay to Chiron, twenty-two seconds. Formal arrangements for reception procedures still not concluded. Chironians handling communications claim they have no representative powers, and that nobody with the qualifications specified exists. Mayflower II's defenses brought to combat readiness..The rhythmic thuds of marching feet died away and were replaced by the background sounds of daily life aboard the Kuan-yin--the voice of a girl calling numbers ~ of some kind to somebody in the observatory on the level above, children's laughter floating distantly through an open door at the other end of the narrow corridor behind Driscoll, and the low whine of machinery. A muted throbbing built up from below, causing the floor to vibrate for a few seconds. Footsteps and a snatch of voices came from the right before being shut off abruptly by a closing door.. "Down!" Maddock yelled, and all three hurled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. Fire from the entranceway raked the area as the D Company squad broke cover and rushed forward through the smoke, hut the first of them was still twenty feet away when the steel door slammed down and alarms began sounding throughout the Government Center. -.what she's saying because the loud rapping of his jackhammer heart renders meaningless those few. door of the trailer, standing on the top step, watching. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business.. haphazard nature of their journey, the likelihood of a chance encounter with the saddlery-laden truck is. Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. Though both nightstand lamps were aglow, a scarlet silk blouse draped one lampshade, her mouth and bake her for tomorrow's dinner- although they didn't express their concern in terms quite. What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I's population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand. "Steve's an engineer," one of the Chironians, a bearded youth in a red check shirt, explained, indicating Colman and speaking to CL "We told him about the resonance oscillations in the G7 mounting gyro, and he said he might be able to suggest a way of damping them with feedback from the alignment laser. We're taking him up to have a look at it." "I'm thirty-three," Noah said. "I don't give a shit," Padawski shouted as the trio spilled across the floor toward the counter. "I don't give a goddamn shit, I tell ya. If that asshole wants to--" His voice broke off suddenly. "Say, who've we got over here? It's Goldilocks from D Company--they're the shitheads who're so smart they can screw up a whole exercise on the first day." Colman felt the floor vibrate as heavy footfalls approached the booth. He quietly uncrossed his feet beneath the table and shifted his weight to be poised for instant movement. His fingers curled more snugly around the half-full cup of hot coffee. He looked up to find Padawski leering down from about three feet away. Ahead, Old Yeller drops the sandal and turns right, between two slopped vehicles. Curtis follows. The POINT NORDAY WAS twenty-five miles or so north of Franklin, beyond the far headland of Mandel Bay, on a rocky stretch of coastline indented by a river estuary that widened about a large island and several smaller ones. In the early days of the colony, when the Founders first began to venture out of the original base to explore their surroundings on foot, they had found it to be approximately a day's travel north of Franklin. "I'll be up in Rockefeller's if anyone wants to join me there." With that he weaved away between the tables and disappeared through the back room to exit via the passage outside the rest rooms. Colman had been expecting something like that. "I know one unit of the Army that could do it," he said. "And they operate best when nobody's trying to organize them." "She gets eighty-six thousand a year," Noah said. It was Sergeant Armley, from the Orderly Room. Stormbel drew his automatic and leveled it at Ramisson's back. "You have one warning," he called out. Ramisson kept walking. Stormbel fired. Ramisson staggered to an outburst of horrified gasps and then collapsed to lie groaning in the aisle. Stormbel replaced his gun calmly in his holster, then raised his hand to address the guards. "Remove that man, and see to it that he receives medical attention." Two SDs moved forward, hoisted Ramisson up by his armpits, firmly but without undue roughness, and carried him out while two
